2	<p>Claim 1</p> <p>D1 is considered to be the prior art closest to the subject matter of claim 1. It discloses the features which are defined in the preamble of claim 1.</p> <p>The subject matter of claim 1 thus differs from the known method by virtue of the features which are defined in the characterizing part.</p> <p>The subject matter of claim 1 is thus novel (PCT Article 33(2)).</p> <p>The problem addressed by the present invention can therefore be considered that of improving the modelling of the temporal temperature profile of steel during cooling.</p>		

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	<p>The solution to this problem proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) for the following reasons:</p> <p>The defined steps of the modelling method are not disclosed in any of the known documents and do not belong to the general knowledge of a person skilled in the art either:</p> <ul style="list-style-type: none">- the modelling of the states comprises a local distribution of the concentration of at least one alloy element which is mobile in the steel- the local proportions of the phases of the steel (austenite and at least one second phase) are determined by the extent to which the phase boundary is displaced,- wherein this displacement of the phase boundary is ascertained by determining the change in the distribution of the concentration of this alloy element by solving a Stefan problem. <p>3 Claims 2 to 17</p> <p>Claims 2 to 17 are dependent on claim 1 and thus likewise meet the PCT requirements for novelty and inventive step.</p> <p>4 Claims 18 and 19</p> <p>The subject matters of claims 18 (data storage medium) and 19 (computer) allow the methods according to one of claims 1 to 17 to be carried out using the stored computer program.</p>

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

- 1 The application does not meet the requirements of PCT Article 6 because claim 19 is not clear.
 - 1.1 The use of the expression "*can be carried out*" renders the subject matter of claim 19 unclear. It is not clearly defined whether and when the modelling method is carried out when the computer program is called. For clarification, the wording "*is carried out*" could be used.

Continuation of:

Box I

The amendments to claim 19 received by fax on 10 April 2006 with the letter of 10 April 2006 introduce substantive matter which, contrary to PCT Article 34(2)(b), goes beyond the disclosure in the international application as filed. The amendment is as follows:

The expression "*can be carried out*" has been replaced with "*is carried out*".

However, this amendment is not supported by the originally filed application and is therefore not allowed.
